This script reads all datasets used in the project from the /data folder.

It loads both FRED (US) and World Bank (International) datasets,

then checks their dimensions to confirm successful import.

```
fred_inflation <- read_csv("data/T10YIE.csv") fred_unemploy <- read_csv("data/UNRATE.csv")
wb_inflation <- read_csv("data/API_FP.CPI.TOTL.ZG_DS2_en_csv_v2_130173.csv", skip=4)
wb_unemploy <- read_csv("data/API_SL.UEM.TOTL.NE.ZS_DS2_en_csv_v2_125709.csv", skip = 4) list(fred_inflation = dim(fred_inflation), fred_unemploy = dim(fred_unemploy), wb_inflation = dim(wb_inflation), wb_unemploy = dim(wb_unemploy))
```
